

Your sewage plant requires teamwork at its best, only being in peak form when all the microorganisms are perfectly attuned. Unilateral strains or incidents may bring this delicate system out of tune. **VTA Biokat®**, the highly efficient, customized organic formula that supports and improves the purification performance of your sewage plant the natural way.

MICROORGANISMS ACCOUNT FOR MAXIMUM EFFECT.

VTA Biokat® provides fine-tuned microorganisms cultivated and stabilized in our fermentation department following an individual recipe specified by our team of scientists especially for your sewage plant. Together with highly efficient precipitating agents and trace elements, these microorganisms will boost the metabolism of your sewage plant.

VTA Biokat® boosts the immune system of your sewage plant and activates its natural purification power.

ONE ORGANIC INNOVATION – MANY BENEFITS

100% ORGANIC

- Activates the purification power of your sewage plant the natural way
- Biocompatibility guaranteed
-

100% INDIVIDUAL

- Tailored to the requirements of your sewage plant
- Specifically cultivated microorganisms, precipitation agents and micro-nutrients

100% EFFICIENT

- Improves purification performance and sludge properties
- Efficiently combats bulking and floating sludge
- Reduces costs thanks to low energy and product consumption
- No risk of infiltration with foreign substances as with activated sludge
